Forms

Examples and usage guidelines for form control styles, layout options, and custom components for creating a wide variety of forms.

CircleCI 2.0 is freaking fast. We reduced builds from minutes to 12 seconds.

Overview

Bootstrap's form controls expand on [our Rebooted form styles](#) with classes. Use these classes to opt into their customized displays for a more consistent rendering across browsers and devices.

Be sure to use an appropriate `type` attribute on all inputs (e.g., `email` for email address or `number` for numerical information) to take advantage of newer input controls like email verification, number selection, and more.

Here's a quick example to demonstrate Bootstrap's form styles. Keep reading for documentation on required classes, form layout, and more.

Email address

We'll never share your email with anyone else.

Password

☐ Check me out

[Copy](#)

```
<form>
  <div class="form-group">
    <label for="exampleInputEmail1">Email address</label>
    <input type="email" class="form-control" id="exampleInputEmail1"
      aria-describedby="emailHelp" placeholder="Enter email">
    <small id="emailHelp" class="form-text text-muted">We'll never share
      your email with anyone else.</small>
  </div>
  <div class="form-group">
    <label for="exampleInputPassword1">Password</label>
    <input type="password" class="form-control"
      id="exampleInputPassword1" placeholder="Password">
  </div>
  <div class="form-check">
    <input type="checkbox" class="form-check-input" id="exampleCheck1">
    <label class="form-check-label" for="exampleCheck1">Check me
      out</label>
  </div>
  <button type="submit" class="btn btn-primary">Submit</button>
</form>
```
